CARL CROPP, Vice Pres.

Fifty Years in the Florist Industry

LEONARD H. VAUGHAN, Pres.

FIFTY years ago, in 1876, the business of Vaughan's Seed Store was founded. Records in the files of the company prove that for at least six years before this, the late J. C. Vaughan had been in the seed and nursery busi-

ness but his first store was opened in 1876 and from the beginning he specialized in seeds, bulbs and supplies for florists. In 1879 he moved his business from the Ashland Block, Chicago, to 42 LaSalle Street and established in connection with it, the first cut flower commission business in this country. And while this branch of his business was sold in 1897 to E. H. Hunt, the firm's intimate association with the florist business, as a source of seeds, bulbs and supplies used by florists, has been maintained ever since. In fifty years many changes have come, and the newer generation may think of the greenhouse industry as chiefly a product of modern inventions and developments. It is useful, now and then, to look backward, and invariably when one does so, he is surprised to see how vast a share of the skill and knowledge which form the chief capital of any industry, is a heritage from the past. Fifty years ago the

Gladioli for forcing were listed in mixture and by color. In the supply pages much was made of grasses, natural and colored, both in bulk and arranged in bouquets and made-up designs. To pampas plumes from the Pacific coast a page was devoted. Fairy flowers, described as the blossoms of the milk weed, were praised as excellent for bouquets. Immortelles and dried flowers occupied relatively more space than now, due, as we know, to the fact that fresh flowers were scarcer and everlasting of necessity in greater use.

In the supply pages it would be difficult to find any great difference between the catalogue of 1884 and one of the present date, except in the matter of mode. Lycopodium and sphagnum moss, basket and wire designs, double pointed toothpicks, Scollay sprinklers, shears, knives and sprays, fertilizers, Philadelphia lawn mowers—the most up-to-date florist might fill 90 per cent of his needs from this catalogue of 42 years ago.

If one were desirous of writing a history of fifty years in the florist business and detailing the changes in practice and the improvement in materials which have come about in that period, he would find no better record of the technical side of this industry than that reflected in Vaughan's Seed Store's Books for Florists. The position of this house has been unique, in its close relation with an allied industry. While fundamentally a seed house, it has specialized in seeds, bulbs and supplies for florists to such an extent that it has been for half a century an integral and an important part of the florist industry.

Flower Seed Leadership

It is unnecessary to recall to the older florists the place which the late J. C. Vaughan filled in the counsels of their industry.

No contribution to this advancement has been more important than that made by the flower seed department of Vaughan's Seed Store, which is today as it has been since the beginning, under the direction of Mr. Carl Cropp, vice president. This book will be found enriched with many novelties and specialties purchased by him during a trip to Europe last summer. It has been his pride to offer the most complete list of flower seeds in this country, and the great progress in forcing flowers from seeds, which has been the outstanding development in

greenhouse management in the last decade, has been largely due to his leadership.

The first fifty years of the history of Vaughan's Seed Store ends only to begin another, in which it is our hope and shall be our endeavor to continue to fill our established place in the florist industry of the United States, to contribute in every way we can to the progress of this industry, and to maintain and increase with our customers the social and business friendships which are so pleasant and so highly valued as an accompaniment to our business activities.

It is useful, now and then, to look backward, and invariably when one does so, he is surprised to see how vast a share of the skill and knowledge which form the chief capital of any industry, is a heritage from the past. Fifty years ago the

florists' business, while in organization and volume of sales far behind the present, was in technique and craftsmanship, highly developed; the individual skill of those who followed it was great and its practices and the materials with which it dealt, were, except for changes of fashion, largely those of today.

Forty-two Years Ago

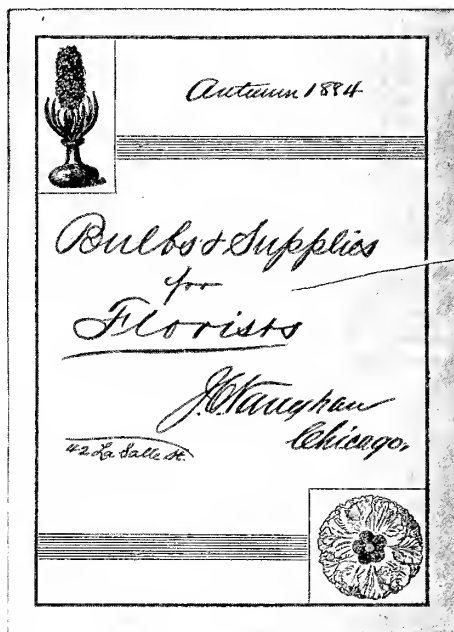

Let us look at a catalogue of 1884, one of the earliest to be found in Vaughan's Seed Store's files. The cover of this interesting book is reproduced herewith. The business at this date had not been incorporated and was carried on in the name of J. C. Vaughan, whose signature (many of you will recognize it) appears on the cover. On the introductory page Mr. Vaughan signs the following statement:

"Having made for several years a specialty of imported bulbs for florists, I can offer good stock in quantity as low as any firm in the U. S. I name especially for florists Dutch hyacinths, forcing Tulips, French Roman Hyacinths, Narcissus and Lilium Candidum and German Lily of the Valley pips. All florists' goods at best prices, newest styles of baskets, bouquet paper, immortelles, grasses, plumes, bouquets, moss, tin foil, flower seeds, etc., Holiday decorations, bouquet green, holly, mistle-toe and plumes. I sold over ten carloads of above goods the past season and I have reason to believe that orders placed with me are reasonably sure of being filled at the right time with good stock at fair prices—three important points which many florists dealing in these perishable articles have paid dearly to learn."

It might serve quite as well now, 42 years later, might it not?

The 1884 fall florists' catalogue offered Hyacinths, Tulips, Crocuses, Paper White Narcissi, Lilium Harrisii, L. Longiflorum, L. Auratum, Hardy Narcissi and the minor bulbs; and Tuberoses, even then grown in the United States, "north of Latitude 40 degrees N."

Of flower seeds especially offered to florists were Balsams, Calceolarias, Candytuft, Gloxinia, Pansies in twenty separate shades, Petunias, extra striped and blotched, and Primulas of a special strain.

You Can Have This Seed Display

Light in Weight, Alluring in Appearance, a Silent Salesman Irresistible

No Investment, No Expense, and a Good Profit

VAUGHAN'S SEED STORE'S patented poster seed racks are made of heavy mat board, of negligible weight, with standard paper easels; exactly like the advertising cut-outs which you use in window and counter displays.

They are faced with brilliant colored designs as illustrated, the work of high class artists, printed in colors on enamel paper, and varnished. The colored flower and vegetable packets are inserted in pockets, so arranged that half of the packet is visible, directly in the line of vision as the light racks stand on the counter. No garden lover can resist the temptation to pick the packets from the rack; and once in her hand, the sale is easy.

New Racks, New Seeds, and a New Sales Appeal

These beautiful racks with their brilliantly colored packets are bright, fresh and clean each season. And racks and packets unite in selling the real merchandise of the seedsman, which is not seeds at all, but the things seeds grow into. The glorious colors and imaginative designs of this display: sell the garden and its bounty; they visualize the dreams that bring seed customers into your store; they have a sales appeal that cannot fail.

This seed display is yours without investment and without expense. It comes by parcel post, as its weight is negligible. Only the unsold packets are returned to us, for credit to your account; the racks are destroyed to be replaced with new ones the next season. You get 40% commission on the packets you sell.

The Season is Under Way. Act Now!

Whether you handle bulk seeds, or your own packets; or the commission boxes of other houses, you need Vaughan's display. It will help sell all your stock; and you are welcome to the help. Some of your customers will insist on Vaughan's Seeds, and these will not have to go unsatisfied.

Fill out this contract form and mail it today. A seed assortment will be in your store in less than a week.

Vaughan's Lawn Grasses

MANY of our Florist customers find a most profitable side line in selling our high quality Lawn Grass Seeds.

Vaughan's "Chicago Parks," "Central Park" and "Columbian" Mixtures are of the highest grade. Fifty years' experience backs these mixtures and our extensive advertising make them sure sellers.

Due to the extremely short crops of grass seed of the past season—those of Kentucky Blue Grass and Red Top being nearly complete crop failures, mixtures carrying large quantities of such grasses have advanced greatly in cost. These grasses being essential to quality mixtures we are maintaining our standard rather than reduce the quality. In pricing our mixtures for the year we are sacrificing our own usual margins, but at the same time increasing profits of the dealers handling our mixtures hoping to make up in volume what we lose on the unit sales.

VAUGHAN'S "CHICAGO PARKS" AND "CENTRAL PARK" LAWN MIXTURES

They produce a beautiful and enduring turf, and do so in the quickest time possible, with endurance considered. The great parks and beautiful cemeteries, where best results must be had in producing beautiful and enduring grass, use Vaughan's Mixtures.

Vaughan's lawn grass seeds are thoroughly re-cleaned; this applies to all the separate kinds of seed contained in the mixtures and each lot tested for germination, in the most painstaking and careful manner.

VAUGHAN'S "COLUMBIAN" MIXTURE SHADY NOOK

For Shady Lawns or Sandy Soils.

On Sandy soil and in shade, conditions are met with when making a lawn, which require the use of a special kind of grass seed.

To provide sure and beautiful lawn grass under such conditions Vaughan's "Columbian" has been prepared with exceptional care.

Vaughan's "Columbian" is an excellent mixture for the uses stated above; its record in public parks, expositions and private grounds everywhere in the U. S. justifies its use by everyone who needs lawn grass for a shady place or for light sandy soil.

THE following bulbs are either grown by ourselves on our own farms or on contract with experienced growers in the locality best adapted for their cultivation. Those classes like Hybrid Amaryllis, Begonias, Fancy Caladiums and Gladiolus, which can be improved by pollenization of class breeding are being noticeably improved each season by our growers.

VAUGHAN'S NEW HYBRID AMARYLLIS

One of the finest strains of Amaryllis we have ever seen, raised by two eminent growers whose entire stock and hybridization for a dozen years we have purchased in its entirety. Flowers are immense, borne mostly four to a stem, in an amazing and beautiful range of colors, blended, splashed and striped in a manner not seen in other strains. The bulbs are 2½ to 3 inches; are sure bloomers. Try 25 or 50; will retail quick at \$1.00 to \$1.50 in bloom.

VAUGHAN'S ASTERS

THE SUNSHINE

Improved Anemone Flowered

One of the most attractive varieties. The plants are sturdy and strong, throwing up long flower stalks, making wonderful cut flowers. Some of the flowers have twisted petals and some have quilled petals; all have a cushion center of tiny quills of a contrasting color which makes a flower look as if it was covered with snowflakes. The blue flowers are dotted with a paler blue and some in white, and the rose in a lighter shade of pink or white. Their delicate beauty is hard to describe. A wonderful cut flower variety, borne on long, stiff stems, and the flowers last a long time after cutting.

This type of Aster was introduced by an English seedhouse several years ago, and later exploited by one of the Chicago private gardeners. We sent stock seed to a German seed grower, and he succeeded not only in selecting two more colors (white and lilac), but also eliminated a large percentage of single flowers from this strain, besides breeding the strain to a flat center away from the anemone-quilled type.

Mr. Max Schling, the noted New York florist, saw this aster in our grower's field the past summer and pronounced it the best flower seed specialty he encountered on his European trip.

EARLY BEAUTY

This type has all of the characteristics of the Late Beauty Type, and is valuable for locations where the season is too short to flower the late type before frost, and for early forcing.

We wish to emphasize, however, that this is not an Early Aster as compared with Early Express or Queen of the Market, but earlier than the Late Beauty Type, which is the latest of all Asters. Planted at the same time this type flowers with the Crego and American Branching.

CARNATION Vaughan's Early and Perpetual Flowering

CARNATION

Vaughan's Early and Perpetual Flowering

Plants bloom in about five months from sowing and continue to bloom until the end of summer. The flowers are very double, of large size. The calyx does not split. They are borne on stiff stems 15 to 18 inches high.

This is a special selection we located at a French grower who has paid considerable attention to this type, and we are confident it is a money maker.

Our strain will produce 90% double flowers and comes true to color. We can supply it in:

ORNAMENTAL POMEGRANATE**A New Christmas Plant**

The seeds should be planted in January or February in flats in the greenhouse and when they are of suitable size to pick off, they should be planted in 2-inch pots and a little later in 4-inch pots where they will get established. As soon as the weather warms up sufficiently, they could be shifted to cold frames in the full rays of the sun and brought back into a forcing temperature about the last week in August and "forced" in a temperature of 60 to 65 degrees for the Christmas trade. They come into flower early, but the first flowers should be kept "nipped" until well on in September when they will begin to take on a general crop which will make them salable in December and for several months following. 200 seeds, \$1.00; 1,000 seeds, \$4.50.

To Whom It May Concern:

Grand Rapids, Mich.

I grow Cinerarias every year and perhaps more than all the rest of my brother florists together and I have never had such Cinerarias as this year and I bought the seed from Vaughan's Seed Store, Chicago, Ill.

P. S. I would advise my brother florists, if you want good seed and beautiful colors, buy Vaughan's Columbian Mix.

LEWIS KUNST.

ZINNIA Giant Colossal

ZINNIA

California Giants

In presenting the above type we offer a rare collection of striking and desirable colors. They are larger than Colossal and a cross between them and the Dahlia Flowered types. They have smaller flat centers with more loosely placed petals. The petals are decidedly imbricated and the flower from bud to full bloom presents a graceful appearance.

Lemon Queen, the petals are light canary on the upper and cerise on the lower side, the two shades blending as the flower develops. It is the only Zinnia with fragrance.

Orange King, similar in color to the Calendula of the same name.

Orange Queen, lighter than Orange King.

Purity, a clean pure white.

NEW VARIETIES

We especially recommend these for trial for comparison with older varieties.

	Oz.	Lb.
Blue Boy. Largest and clearest blue, abundant bloomer.	\$2.00	
Jeanne Manitsch. A sport from Rose Queen and an improvement on Zvolanek's Rose. Striking pink, shading off to deepest pink.	7.50	
Orange King. It is a beautiful glowing orange and practically sunproof. It throws fours regularly on long stiff stems. A spray of this grand variety under artificial light is glorious. This is indeed the richest and deepest orange-colored Early Sweet Pea yet introduced.	3.00	
Pink Cherokee. This new variety is of surpassing beauty; a fine pink suffused with salmon on a deep cream ground, of vigorous robust habit. Prominent growers who had advance trials of this novelty praise it very highly.	2.00	
Silver Blue. The large flowers borne three or four to a spray are beautifully spaced, and are a pleasing delicate shade of lavender blue, showing up splendidly in both natural and artificial light. Stems are long and sturdy. For a light blue we feel that those growing Sweet Peas under glass will find Silver Blue a most satisfactory variety.	1.40	
Sweet Lavender. A pure lavender self, of enormous size, beautifully frilled, always bearing fours and with good stems. Sweet Lavender will undoubtedly become the most popular variety among lavenders for forcing.	2.00	
Vulcan. The color is the most vivid scarlet ever seen in Sweet Peas; never burns in the hottest sunshine, and in fact, the brighter and hotter the sun, the brighter and more intense is the color. Stems are long, and the three or four blooms are always gracefully spaced.	1.40

SEEDS OF BIENNIALS AND HARDY PERENNIALS

Many of the biennials and perennials are now as important to florists as Asters, Sweet Peas, Verbenas, etc., are among the annuals. Some can be forced, such as Delphinium, Canterbury Bells, etc., while many others sell as readily as Geraniums if grown

in pots, not to speak of the cut-flower sorts, such as Coreopsis, Gypsophila, Chrysanthemum, Shasta Daisy, Physostegia, etc. They are really needed in every florist's establishment that caters to the better-class of trade. The demand for them is increasing.

GRASSES, Ornamental

Arundo Donax. From the Greek meaning a reed. Tall leafy perennial grasses resembling bamboos, 8 to 30 feet tall, Giant Reed, rapid grower, clothed with broad, pointed leaves at regular intervals. Grown for lawn decoration. The tall showy plumes are reddish at first and last for a long time. Trade pkt., 15c; oz., 60c.

Arundo Donax fol. variegata. Much dwarfed and less hardy than above, usually 4 to 7 or even 12 feet, with elegant leaves striped from base to tip with creamy white and green. Trade pkt., 15c; oz. 70c.

Eulalia Japonica Zebrina. Perennial grass, used for ornamental purposes in the garden. Rapid growing and if left undisturbed will form clumps 18 feet in circumference. The leaves are banded with white. Trade pkt., 15c; oz., 80c.

Eulalia Japonica. The correct name is Miscanthus Sinensis. Absolutely hardy. A strong growing ornamental grass. Good for specimen planting. Trade pkt., 15c; oz., 80c.

Erianthus Ravennae, Plume Grass. Tall stout reed-like perennial, best hardy substitute for the Pampas Grass. The foliage forms graceful clumps, from which rise long and handsome plumes. Grows easily from seed and will flower first year if sown early. The plumes are fine for winter use when dried. Trade pkt., 15c; oz., 80c.

Gymnotherix Latifolia. An ornamental perennial grass also known under name of Pennisetum latifolium. 3 to 4 feet, bearing several nodding plumes 1 to 2 feet long. Trade pkt., 15c; oz., 60c.

Gynerium Argenteum. Pampas Grass. The finest of all plummy grasses and the most important commercially. The plumes are silvery white and are dyed and shipped in large quantities from California to Europe. Lives with protection as far north as Rochester, N. Y. Perfect specimens can be obtained only in light, rich soil with moderate moisture, especially in early growth. Trade pkt., 15c; oz., 60c.

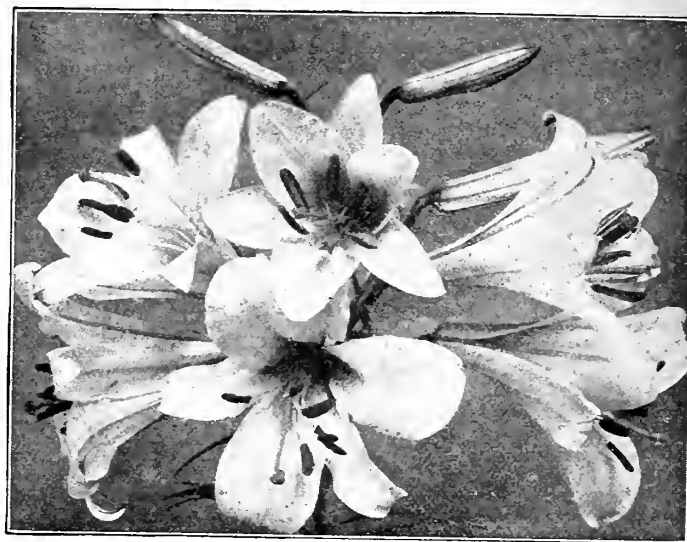

Stipa Pennata. Feather Grass. A well-known variety which has been grown in gardens. Trade pkt., 35c; oz., \$1.80.

This remarkable "Gold Medal" Canna has been the sensation of the past nine years. ROSE PREMIER

Climbing Roses

The following Roses are the best adapted for general planting and we particularly recommend for Easter forcing such varieties as — Dorothy Perkins, Excelsa and Roserie. The stock we are offering in these varieties is well ripened and best adapted for this purpose.

CLIMBING AMERICAN BEAUTY. Large double rosy crimson, flowers freely produced in June and occasionally throughout the season. 2-year dormant, each, 60c; doz., \$5.00; 100, \$40.00.

DR. W. VAN FLEET. A delicate shade of flesh-pink, deepening to rosy-flesh in the center. High center petals beautifully undulated and cupped; buds pointed, flowers full and double, open to an immense diameter, sweetly perfumed. Beautiful bronze-green foliage. Price, 2-year, dormant, each, 60c; doz., \$5.00; 100, \$40.00.

DOROTHY PERKINS. The best of the pink ramblers. 2-year dormant, each, 40c; doz., \$4.00; 100, \$30.00.

EUGENE JACQUET. The earliest and most profuse flowering of all the climbers and of the easiest cultivation. Almost every eye produces a handsome truss of fragrant, cherry-red flowers. It flowers a week earlier than Tausendschon or Roserie under the same conditions and carries handsome, dark green mildew-resisting foliage. It holds the flower unusually long—the color improves with age. 2-year, dormant, each, 60c; doz., \$5.00; 100, \$40.00.

EXCELSA. Deep crimson and scarlet, large full trusses. 2-year dormant, each, 40c; doz., \$4.00; 100, \$30.00.

FLOWER OF FAIRFIELD (C. P.). Of the numerous varieties raised in the past years this is doubtless one of the best. Its flowers, which are produced in profusion, are of a fine crimson color, and more lasting and brilliant than the common Crimson Rambler. The growth is vigorous, flowering freely and continuously throughout the season. 2-year dormant, each, 60c; doz., \$5.00; 100, \$40.00.

MARY WALLACE. The attractive new climber originated by the late Dr. Van Fleet. Semi-double, bright, clear rose-pink, salmon at base of petals. 2-year, dormant, each, 75c; doz., \$8.00; 100, \$60.00.

PAUL'S SCARLET CLIMBER. This is without question the most important addition to the list of climbing roses; no other rose in any class can compare with it for brilliancy of color, which is a vivid scarlet that is maintained without burning or bleaching until the petals fall. The flowers are of medium size, semi-double, very freely produced in clusters. It is of strong climbing habit and perfectly hardy. 2-year, dormant, each, 60c; doz., \$5.00; 100, \$40.00.

ROSERIE. True cerise pink, strong grower and good producer. A sport from Tausendschon. Price, 2-year, dormant, each, 60c; doz., \$5.00; 100, \$40.00.

ORNAMENTAL POMEGRANATE

A New Christmas Plant

Dwarf growing with bright scarlet double flowers. Pot into four-inch and place in cold frame in the full rays of the sun as soon as all danger of frost is over, keeping them pinched to make bushy plants. If they get well established in four-inch they can be shifted in five-inch about the middle of July. Care should be taken not to over-pot them as they should be well rooted through to get in bloom. Take in latter part of August and place in temperature of 60 to 65 degrees. They should be pinched back for the last time about the middle of September to give full crop for December.

PEONIES IN CASE LOTS

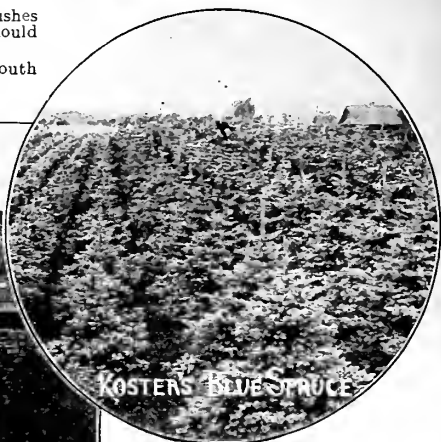

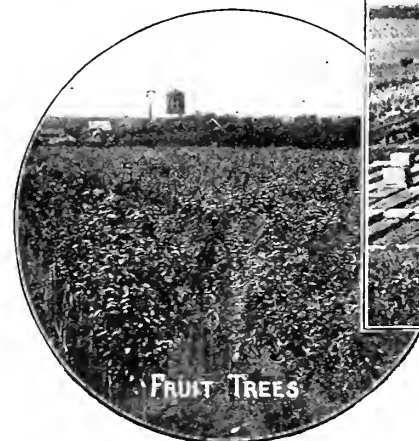

For several years we have sold specially packed cases. The roots are young and each has 2 to 5 eyes. These cases contain 75 double white, 75 double pink and 50 double red, each color separate—200 roots in all. Price, per case, \$30.00. We cannot divide cases.

Ornamental and Flowering Shrubs

Our shrubs are Nursery-grown and are transplanted every two or three years. They are nice, shapely bushes with plenty of good fibrous roots, and are such plants as are in demand by the first-class retail trade. They should not be compared to stock that is never moved from the cutting or seedling beds until sold.

Our Nursery is located at Western Springs, 15 miles west of Chicago, on the C. B. & Q. R. R., two blocks south of 47th Street, on the continuation of East Boulevard.

Visitors are invited to inspect our stock at any time. We have a choice lot of specimens such as are not usually seen. Our customers will be pleased with the class of stock we send them.

Specimens. This term is applied to plants that are perfect in height and diameter as well as shape, and are recommended for immediate effect.

Shipping Directions. All stock is sold F. O. B., Western Springs. Packing charges to be added on all orders for shrubs, dormant roses, fruits, trees and vines, at cost. Always give full and explicit shipping directions, as our responsibility ends on delivery to the express or freight office in good condition. All trees, shrubs and plants shipped subject to customer assuming risk regarding their own State Nursery Inspection Regulations. Certificate furnished with each shipment.

Where personal selection of stock is made at our Nursery we charge according to its value.

Fruit Trees

Since we grow these Fruit Trees mainly for our retail trade the quality is vastly superior to the stock ordinarily offered by Nurserymen, hence prices should not be compared to ordinary fruit tree stock. Our trees are just what the better class of retail customers require.

Vaughan's VIGOR Strawberry Plants

Grown in Northern Michigan's Ideal Fruit Soil and Climate.

Our plants are grown under ideal conditions in Northern Michigan. Note illustration for root development of a single specimen. They have been developed from selected plants. We expect to make "Vaughan's Vigor" Strawberry Plant the standard for the country. We know you will be pleased. Varieties below are up to date.

Write for pamphlet on Strawberry Culture.

AROMA. (Per.) Late. One of the most popular late varieties. Fruit large to very large; holds its size well throughout all the pickings. Berry is roundish, conical, smooth and perfect in form and of a beautiful bright glossy red in color; very firm and of high quality. Its rich aromatic flavor has suggested its name. The habit of spreading which this variety possesses opens the way for the sunlight to reach the crown. The leaves are broad, clean and smooth and of a dark green color. Price, 100, \$1.25; 1000, \$9.00.

CHARLES THE FIRST. Charles the First has proven itself one of the very best early berries, yielding more quarts of fine large berries than any other early variety. It is a strong fertilizer and very thrifty grower; berries are large, regular in form. Recommended by successful berry growers. Price, 100, \$1.00; 1000, \$8.00.

DR. BURRELL. (Per.) Medium early. The berries are large, delicious and beautifully formed. The surface of the berry is a deep glossy red only a trifle lighter in color than the Senator Dunlap. The meat is solid and rich. Its long and heavy root system makes it a splendid drought resister. The foliage is large and of a dark green, having a tough leaf tissue insuring freedom from leaf spots. Price, 100, \$1.00; 1000, \$8.00.

GIBSON. (Per.) Medium early. Berries are large and regular in shape holding their size well to the end of the season. Color rich red. Flavor is neither sweet nor sour, but just right for canning. Extremely productive, in fact we know of no variety that will produce more quarts to berries per acre than the Gibson. It makes a strong vigorous plant that withstands adverse conditions admirably. This variety seems to embody every requirement necessary for a profitable berry. We recommend it and know you will not make any mistake in planting Gibson. Price, 100, \$1.00; 1000, \$8.00.

BIG LATE. This is a late pistillate variety that is very highly recommended by the introducers. A strong healthy grower and an excellent drought resister owing to its wonderful root system. The foliage is large and healthy; the berries, which are produced in abundance, are of exceptional quality, fine flavor and very delicious. An attractive berry that will command a big price. Price, 100, \$1.25; 1000, \$9.00.

MAGIC GEM. One of the very latest introductions. A very strong plant and makes a good row of thrifty looking plants. Berries of very best flavor, good size and color; will ship to nearby markets in good condition. Very productive and recommended for the home table. A southern grower says, "Magic Gem berries are so large that they will not go into a common water glass." Price, 100, \$1.25; 1000, \$9.00.

PREMIER. (Per.) Early. Berries are large, beautifully formed, red through and through; flavor delicious. A splendid shipper. The deep heavy rooting system makes the plant a strong drought resister, and it is especially adapted to any soil or climate, giving you a big crop of fancy berries which will sell at highest prices. Where extra fancy early fruit is wanted we advise this. Price, 100, \$1.25; 1000, \$9.00.

SENATOR DUNLAP. (Per.) Midseason. The fruit is dark red with glossy finish, shading to a deep scarlet on the underside. The meat is a bright red all through and exceedingly juicy. It succeeds everywhere and with everybody—the new beginner as well as with the veteran grower—but should not be allowed to mat too thickly. For a medium sized productive early to midseason berry you need not hesitate to plant Dunlap. One of the best and most popular. Price, 100, \$1.00; 1000, \$8.00.

PROGRESSIVE. (Everbearing.) Has long been the leading everbearing variety. It now has to take second place as the new Champion is superior in every respect. The Progressive is a tall healthy grower, deep rooted and entirely free from fungus diseases. Very productive, berries medium-size, good quality and delicious flavor. Price, 100 for \$1.50; 1000, \$10.00.

CHAMPION. (New Everbearing.) A strong, healthy, deep-rooted plant, very productive. Fruit similar to Dunlap in size, shape and color. A beautiful rich red color clear through, good quality and delicious flavor. The one mighty big feature of the Champion is that every plant bears a full crop of fruit, something that cannot be said of any other everbearing variety. Owing to its wonderful productiveness and its ability to bear through dry weather it offers wonderful possibilities to commercial growers. In addition to the wonderful fall crop produced by the Champion, they are the earliest to ripen in the spring. Price, 100 for \$2.00; 500 for \$8.00; 1000 for \$15.00.

SPECIAL OFFER No. 19. A Strawberry collection, 100 fine strong plants (Spring delivery only) in four good sorts, our selection, postpaid, for \$1.15.

Cauliflower

Vaughan's New Snowball

One of our Specialties. We know our strain is the equal of any that can be produced. We have tried nearly every other on the market and we have never yet come across anything superior to Vaughan's New Snowball. It is the result of years of careful selection by a most capable and painstaking gardener who grows the seed especially for us on the island of Amager, near Copenhagen, Denmark, where growing conditions are ideal for the production of perfect seed heads. Vaughan's New Snowball is the best general purpose variety for either spring or fall planting. Heads are usually 9 to 10 inches across perfectly white, solid, deep and compact.

Pkt., 25c; ¼ oz., 75c; ½ oz., \$1.35; oz., \$2.50; ¼ lb., \$8.50; lb., \$32.00.

Vaughan's Earliest Dwarf Erfurt

Combines all pedigree points—earliness, purity of color, dwarf habit and fine grain. A profitable market garden sort.

Pkt., 25c; ¼ oz., 75c; ½ oz., \$1.35; oz., \$2.50; ¼ lb., \$8.50; lb., \$32.00.

Erfurt (Germany-grown). Pkt., 30c; ½ oz., \$1.60; oz., \$3.00.

Dry Weather

For dry climate and dry seasons. Very sure heading and second early. Heads larger than Snowball and snow white.

Pkt., 25c; ¼ oz., 60c; ½ oz., \$1.10; oz., \$2.00; ¼ lb., \$7.50; lb., \$30.00.

Danish Snowball

This is a grand second early. It is the result of long, careful selection, and uniformly produces even, regular heads. Through many seasons it has proven itself reliable. Pkt., 10c; ¼ oz., 40c; oz., \$1.40; ¼ lb., \$5.00; lb., \$20.00.

VAUGHAN'S HIGH-GRADE FERTILIZERS

Prices for Florists F. O. B. New York on ton lots. Cartage charged on smaller quantities.
The Yield and Quality of Vegetables Depend Upon Continuous and Rapid Growth

It has been demonstrated that market-garden crops of the best quality are those which are grown under conditions which permit of a continuous and rapid development. Any delay in the growth of a lettuce or radish causes that sharp and pungent flavor of the former and the bitterness and toughened fibre of the latter, beets become stringy, etc. Plant food of the right amount and kind controls the yield and quality of market-garden products more than

any other condition, and it is neither wise nor economical to depend upon the natural condition of the soil or the application of stable manure only for profitable crops.

Prices are unsettled. In case market declines, orders will be filled at market prices, and difference refunded.

VAUGHAN'S LAWN AND GARDEN FERTILIZER

Formula 3-12-4, meaning 3 per cent ammonia, 12 per cent phosphoric acid, 4 per cent potash. A very desirable high grade all around fertilizer. There is sufficient ammonia to give the young plants a quick and vigorous start and maintain a healthy growth. Grass and early garden truck need lots of phosphoric acid, which this supplies. For lawns, make first application in the early spring when frost is out of the ground, distribute evenly 25 pounds of fertilizer to every 1,000 square feet of lawn. In seeding down a new lawn, scatter double the amount, 50 pounds of fertilizer in every 1,000 square feet; rake thoroughly, then sow seed.

5 lbs., 45c; 10 lbs., 80c; 25 lbs., \$1.15; 50 lbs., \$2.10; 100 lbs., \$3.80; 250 lbs., \$8.75; 500 lbs., \$17.00; 1000 lbs., \$33.00; 2000 lbs., \$61.00.

Fertilizer Mixture (Analysis) 5-8-7

This is our best brand of concentrated manure; excellent for mixing into potting soil or as a top dressing. It is a money-maker. It is excellent for Carnations if applied by the end of October or in November. It can also be applied as a liquid manure by using an 8-inch potful to a barrel of water. 25 lbs., \$1.35; 50 lbs., \$2.25; 100 lbs., \$3.90; 500 lbs., \$17.35; 1000 lbs., \$32.65; 2000 lbs., \$59.75.

PULVERIZED LIMESTONE. The agricultural value of lime has been known for centuries, it is an economic neutralizer for soil acidity, also beneficial to the soil in many other ways; it improves the texture of the soil, lets in air and moisture, liberates nitrogen and other plant food, makes your soil sweet—enlivens it—that is, makes conditions favorable to plant growth by giving life to the soil bacteria which make it productive. Lime will be found very beneficial in the growing of all garden crops, fruit trees and flowers. Try it on the lawn too. Apply after the land is plowed or dug for a crop, scattering with a lime distributor, 2 tons or more per acre, or by hand in small gardens—about a large handful to a square yard. Packed in cotton sacks—not paper.

Strewn over and dug into the vegetable garden or placed directly in drills or hills, it promotes a rapid, steady growth until maturity. It makes the richest, safest and quickest Liquid Manure.
